

## ROOFING SPECIFICATIONS

Contractor to furnish and install all labor, materials, equipment and consumables to complete the scope of work as listed below:

1. Contractor will furnish and install 15lb felt, 3 feet of Ice and Water shield along eaves, 30yr dimensional shingles, metal drip edge, metal gutter apron, continuous ridge vent and all other appropriate flashings.
2. Contractor will remove all waste and excess material.
3. Contractor must include 2 year warranty on all labor.
4. Contractor must provide a copy of their safety & fall-protection programs.
5. Preference given to GAF "Master Elite" and "Certified" contractors who work with "Community Contractor Program". See link below or the attached brochure for more details. <http://apps.gaf.com/Content/Documents/23194.pdf>
6. Option #1: Contractor to install 7/16" OSB roof sheathing. Sheathing and H clips furnished by Habitat. Fasteners and other consumables furnished by Contractor.

## GUTTERS & DOWNSPOUTS

1. Furnish and install 5" prefinished white "K-Style" seamless aluminum gutters along all eaves as necessary.
2. Pitch gutters as necessary for adequate draining per industry standards.
3. Furnish and install 4" prefinished white downspouts with 36" metal downspout extensions pitched away from foundation at grade level.

Habitat for Humanity  
Community Contractor Program  
Brochure

Updated 2/11

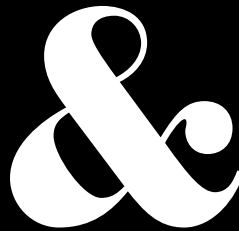

*Quality You Can Trust...From  
North America's Largest Roofing Manufacturer!™*

**Introducing**  
 The GAF  
 Habitat For  
 Humanity  
 Community  
 Contractor  
 Program

HABITAT for  
 HUMANITY

Donate your  
 labor...and  
 earn a powerful  
 business-building  
 certification!

*Quality You Can  
 Trust...From  
 North America's  
 Largest Roofing  
 Manufacturer!™*

# What It Is:

GAF Materials Corporation and Habitat For Humanity have developed a program that will benefit both the community and contractors who participate in the program. Here's how it works:

- Habitat For Humanity builds and renovates houses with families in need of affordable housing
- GAF provides roofing materials
- GAF Master Elite™ and Certified™ Contractors provide labor
- Participating contractors will be recognized for their contribution and may present themselves as "local partners" in the GAF Habitat For Humanity Community Contractor Program.
- GAF will also be donating a System Plus Ltd. warranty for each new roof installed under this program

## Contractor Advantages:

- Differentiation... Positions you as a strong supporter of your community who can be trusted
- Identification... You will receive access to special logos to use in marketing materials, as well as an I.D. card and a certificate
- Web Recognition... GAF's Contractor Locator will identify your Habitat for Humanity status

## Your Contribution:

There are three ways to earn your certification...

- Install roofing on two new Habitat For Humanity homes per year OR
- Install one *re-roofing* project per year that *includes* a tear-off OR
- Donate labor on two *non-roofing* projects per year (only when roofing is not needed locally—see details below)

## Who Can Obtain And Use This Designation:

- Members of GAF Materials Corporation's Master Elite™ and Certified™ Contractor Programs

## How to Get Started:

### Step 1 Call and Register With CCP...

1-888-532-5767. We will contact your local Habitat For Humanity affiliate and register you. We will email you to let you know you are registered.

### Step 2 Arrange A Project...

by contacting your local Habitat For Humanity affiliate. You are responsible for working directly with the local affiliate and mutually agreeing with the affiliate on how you will support them on specific jobs. (e.g., if roofing is needed or not, or if a tear-off is required and how it will be disposed of).

### Step 3 Complete The Project...

You are responsible for purchasing and bringing all required roofing material to the job site. You will subsequently be given a material credit for GAF-designated roofing material by GAF. All jobs should use approved GAF shingles and GAF accessories. GAF will only reimburse you for material by means of a material credit. See Roofing Project Requirements below.

### Step 4 Record the Project...

Obtain a Habitat For Humanity Job Registration Form at the GAF Certified Contractor Zone, fill in all required information, and attach receipts. Once all documentation is complete, please submit via:

Email: GAFHFH@gaf.com  
Fax: 973-628-3866  
Mail: GAF Materials Corporation  
Attn: CCP/11-2  
1361 Alps Road  
Wayne, NJ 07470

**Warranty NOTE:** GAF will supply the System Plus Warranty after the roof is registered. Contractors do not have to register this warranty.

### Step 5 Receive Your Recognition And Material Credit...

After receiving and validating your job record, GAF will send you a CD with an electronic copy of the certificate and logo that recognizes your contributions and membership in this program. We will also send you a material credit (within 2 months of receipt of all required information) that you can redeem at a GAF stocking distributor of your choice.

### Step 6 Keep Supporting The Program...

As noted above, membership in this program requires that you install two new Habitat For Humanity roofs, or one re-roof/tear-off, or two days of equal labor per year.

**GAF**

## Qualifying Projects:

- Contractors can install roofing OR contribute labor for other needed projects designated by local Habitat For Humanity affiliates.
- You need two (2) total labor units to gain complete certification.
- *New Construction...* One (1) unit of labor donation can be obtained when installing roofing on newly constructed homes. This would be 1 new roof completely installed. (Note: the average new home is 1.5 squares)  
**If a Contractor does two new roofs per year, they gain certification.**
- *Re-roofing...* Two (2) units of labor donation can be obtained when a complete tear-off and replacement is completed. **If a Contractor does one re-roofing project per year, they gain certification.** Note: GAF does not support roofing over existing roofing and therefore will not support labor or material donations in this manner. Only one unit of labor would be obtained for a re-roofing job that did not include tear-off.
- *Non-Roofing Labor...* When a new roof is NOT needed locally, Contractors can choose to provide labor for other needed projects designated by local Habitat For Humanity affiliates. To earn certification with non-roofing labor, Contractors would need to supply 40 man hours of labor to obtain 1 unit of labor contribution.  
**If a Contractor does two days of non-roofing labor as described above, they gain certification.**
- When a roof needs repairs, Contractors would only get credit if they donated 40 man hours of labor, which equals 1 labor unit.
- Contractor certification begins with the registration of one project or one unit of labor completed and registered with both the local Habitat for Humanity affiliate and GAF's Certified Contractor Program. To complete certification requirements, a second roof or labor

unit would have to be completed within 12 months of the registration of the first project or labor donation.

- Individual contractor's certification term would begin and end with the calendar date of the registration of their first project. The term would then have to be renewed based on this date, not an end of year calendar.

## Roofing Project Requirements:

- All GAF Habitat For Humanity Community Program installations should use GAF shingles and accessories from the Smart Choice® Weather Stopper system. GAF will provide reimbursement for the following products only. If you choose to install other products, you may do so at your own expense.
- **Eligible Shingles** – Timberline® Natural Shadow™, Timberline® High Definition 30-year, Timberline High Definition® 40-year, or Royal Sovereign® shingles
- **Roof Deck Protection** – Shingle-Mate® Roof Deck Protection (preferred), or any other GAF Roof Deck Protection available through distribution
- **Leak barriers** – Weather Watch® or StormGuard® Leak Barriers (preferred), or any other GAF Leak Barriers available through distribution
- **Ventilation** – Any Cobra® (preferred) or Master Flow® Ventilation Product at the ridge, to meet local codes.
- **Ridge Cap Shingles** – Ridglass®, Seal-A-Ridge®, Z® Ridge, or Timbertex® Ridge Cap Shingles (all preferred), or any other GAF Ridge Cap Shingle available through distribution
- **Starter Strip** – Pro-Start® Starter Strips
- Participating contractors are responsible for working with their local Habitat For Humanity chapter in determining who is responsible for tear-offs, disposal and other activities required for a roofing installation.

- GAF Materials Corporation is only responsible for reimbursing contractors for GAF roofing material for approved Habitat For Humanity installations where the contractor has donated labor and expertise for installing a roof. GAF is not responsible for any other expenses incurred in respect of the installation.
- All projects are to be installed according to local codes and GAF's Pro Field Guide specifications. The installation of Leak Barrier over the entire roof, double felting, etc. are not required and GAF will not reimburse for extra material costs of this kind.
- Any and all roofing projects over 30 squares require pre-project approval from GAF's Certified Contractor Program team. Call: 888-532-5767, option 3 for approval of projects over 30 squares.
- Purchase, delivery, and cost of all non-GAF roofing materials like drip edge, nails, flashing, sealants etc., is to be coordinated locally between you and the Habitat for Humanity affiliate. GAF will not reimburse you for these materials.

*Thank you for your interest in the GAF Habitat For Humanity Community Contractor Program and for making a real difference in your community.*

 **Habitat for Humanity**

## About **Habitat** For **Humanity**

# F

**ounded** more than 34 years ago by Millard and Linda Fuller, the concept that grew into Habitat for Humanity International was born at Koinonia Farm, a small, interracial, Christian community outside of Americus, Georgia. The Fullers first visited Koinonia in 1965 after having recently left a successful business and an affluent lifestyle in Montgomery, Alabama to begin a new life of Christian service. It was at Koinonia that the Fullers met Clarence Jordan and together they came up with the idea of the Fund for Humanity. In 1968, the Koinonia community began work to build homes and sell them to families in need at no profit and no interest, which would be the foundation for Habitat for Humanity.

**In 1976**, after the Fullers traveled to Africa to test the principles of Partnership Housing and the Fund for Humanity, they returned to Americus, Georgia, and formed Habitat for Humanity.

**In 1984**, former U.S. President Jimmy Carter and his wife Rosalynn Carter took their first Habitat work trip, the Jimmy Carter Work Project,

to New York City. Their personal involvement in Habitat's ministry brought the organization national visibility and sparked interest in Habitat's work across the nation. Habitat experienced a dramatic increase in the number of new affiliates around the country.

**In 1991**, Habitat's 10,000th house is built in Atlanta, Georgia, and Habitat's first all-women-built house is completed in Charlotte, North Carolina. A Habitat affiliate in Winnipeg, Canada, opens the first Habitat ReStore outlet, which sells quality used and surplus building materials donated from outside companies and organizations, and the first international campus chapter is chartered at the University of Technology in Lae, Papua New Guinea.

**In 1996**, Habitat dedicated its 50,000th house worldwide in Pensacola, Florida, while the 50,001st house was celebrated in Mexico City. Habitat also began building in its 50th nation – Romania. Just one year later, Habitat's 60,000th house was dedicated in Dallas, Texas.

**By 2004** Habitat organizations in more than 100 countries had built 50,000 houses in the U.S. and more than 150,000 around the world.

**In 2005**, in Knoxville, Tennessee, Habitat celebrated the construction of its 200,000th house, providing safe and decent shelter for one million people since its founding in 1976. Several months later, Habitat launched Operation Home Delivery to help provide assistance and rebuild along the U.S. Gulf Coast in the aftermath of hurricanes Katrina and Rita.

**On November 13, 2008**, Habitat for Humanity raised the walls on its 300,000th house in Collier County, Florida; the next day, work began on the 300,001st house in Zacapa, Guatemala.

**Today**, Habitat for Humanity has built more than 400,000 houses, sheltering more than 2 million people in more than 5 continents and 3,000 communities worldwide.
